STEM Superheroes Programming

All-Day Programs and Activities, 9 a.m.- 4 p.m.

Ice Escape *Tot Lot*

Toddlers will use their superpowers to rescue common objects that have been trapped in ice!
Times: 10-10:30 a.m. and 1-1:30 p.m.

Super STEM Gadgets *Art Studio C*

Some superheroes aren't born with powers. Instead, they use high-tech gear and gadgets to save the day! Inspired by these heroes, children will use recycled materials to design their own super gear and gadgets.

DIY Comic Strips *Art Studio B Project Space*

Design a pop art style comic strip that can depict a super scene of your own imagination.

Galaxy Quest *Art Studio B Tactile Table*

A cosmic adventure awaits you at the Art Studio's Tactile Table. Children will sculpt planets, examine space rocks, and more with our galaxy kinetic sand.

SuperHEARoes *Fab Lab B*

Test your super-hearing capabilities as you explore the powers and properties of a novel tool called a piezo disc.

Superhero Training Course *Festival Plaza*

Test your super speed, super strength, and other super abilities as you conquer our super obstacle course.

Amazing Animals *Festival Plaza*

Animals have superpowers too! Explore the amazing adaptations that help animals thrive. Then create your own super animal by putting together the most advantageous animal adaptations.

Marvelous Minds *Art Studio A*

Make things move with your mind! (Well, almost.) Children will test out how to use static electricity, magnets, and more to make things move without even touching them.

Up, Up, and Away *Try-It-Truck-Satterlee Way*

Flight and levitation are two popular superpowers. Children will explore these super skills by creating their own flying machines to test on zip lines, and watching as things levitate in our wind tunnel.

Lights, Camera, Action *Satterlee Way*

Become the star of your own superhero movie! Children can get creative during a photoshoot by acting out scenes in costumes, planning storylines, or taking a seat in the director's chair.
